

## Platform lifts for retail environments

### Gartec has installed over 200 lifts in retail environments in just the last three years.

Gartec is the preferred choice for so many retail establishments because we understand the demands of the sector like no other lift company. Through our knowledge of retail environments, we have been asked to install over 200 platform lifts in shopping centres, department stores and individual retail spaces in just the last three years. Within a retail space, a lift's design flexibility, performance and reliability crucial. It is also vital to minimise interruption to trading during the physical installation. Our depth of experience enables us to provide a service for retailers that ticks all the boxes.

#### ✔ Design flexibility – front or back of house

Our lifts come in many different footprint sizes – ensuring we can find the best match to available space – and can be fully customised to fit in with any visual design scheme.

#### ✔ Performance and reliability

The 7000 model gives strong performance and flexibility; being certified for the carriage of goods as well as passengers; caged trolleys and small pallets can be transported at the touch of a button. Our lifts are renowned for their quality and perform reliably year in, year out.

#### ✔ Minimal disruption

Our lifts are well suited to retail installations as any disruption to trading is kept to an absolute minimum. With no pit, no lifting beam, and no structural shaft needed for a Gartec platform lift, the installation time for a standard lift is a swift two days.

# With this much experience, why shop around?
