

Full Range Adjustable from 60mm-350mm

The A-PED is the Euroclass A1 fire-rated, fully non-combustible aluminium adjustable pedestal system from Alfresco Floors. It has been developed in response to the changes in regulations requiring the use of non-combustible materials in multi-storey buildings.

Meeting the demands for a fully fire-rated external decking and paving solution, the A-PED external flooring system is designed specifically for external balconies, terraces, roof and winter gardens.

60mm-350mm

A1 FIRE-RATED

NON-COMBUSTIBLE

QUICK INSTALLATION

LIGHTWEIGHT

SUPERIOR STRENGTH

SELF DRAINING

UV RESISTANT

CHEMICAL RESISTANT

MAINTENANCE FREE

SUITABLE FOR USE IN
TEMPERATURES FROM
-30°C TO +90°C

Technical data

Composition

The A-PED comprises of 3 components
PED-base, PED-head, and PED-thread with 2 locking nuts

Dimensions

Head - diameter 76mm, surface area 46cm²
Base - diameter 112mm, surface area 100cm²

Height range

Adjustable uninterrupted from 60 to 350mm
(with slope correction option)*
*currently in production

Load capacity

Uniformly distributed >2000 Kg
Concentrated 3000 Kg
(BBA tested)

Materials

PED-base and PED-head 100% recycled aluminium
PED-thread and nuts 100% coated steel
All components 100% recyclable

For use with:

Porcelain, Aluminium decking, Concrete paving, Stone paving, and other components
