

Planters

Bailey Streetscene supplies a wide range of planters with varying designs and materials including timber, steel and cast iron. The aim of the planter is to add a vibrant touch to an otherwise dull or unsightly area. You can plant evergreen shrubs to provide colour all year round in any urban surroundings or you can plant seasonal plants which ring the changes with each season

Cast Iron has always been a popular material choice with architects and specifiers for heritage sites and parks. Available in traditional and contemporary designs cast iron planters have the benefit of both strength and beauty.

Product Code: BSS41555

Steel is a very popular material choice for Planters because it gives a strong, durable and vandal resistant solution whilst remaining simple to manufacture and extremely cost effective. Our Planters range from lightweight, decorative planters to larger more versatile planters which include benches to create a geometric pattern of your choice.

Bailey Streetscene's range of stainless steel Planters are available in Grade 304 stainless steel; or, for more aggressive environments such as industrial or coastal areas, Grade 316 stainless steel. Stainless steel planters have become more popular with architects and specifiers in recent years as the trend in street furniture changes to a more modern, contemporary look.

Timber is the most popular choice for Planters as it is economical easily sourced from renewable sources and it integrates perfectly into surrounding landscapes. All our timber planters are preservative treated to ensure a long life span in all weather conditions. They come in a number of varying designs and sizes to suit all environments. The timber is all supplied from renewable sources.
