Secured by Design

Police Preferred Specification

Recommended by the police

Having been tested to BS EN 1303:2015 and TS007 3*, the Breaksecure XP is also endorsed by Secure by Design, the police preferred specification. Helping to protect your home and belongings.

Don't become another crime statistic!

Official data from Scotland Yard indicates only 5% of burglaries are solved.

It's important to know you will return to find your home just as you left it, and that's why it's vital to make sure your external doors are well protected.

90% of burglars gain entry through the front or back door, so fit Breaksecure XP to ensure you don't become the next crime statistic!

41%
Rear Door

49%
Front Door

Current data from the Office for National Statistics

REMEMBER...

- > After a burglary you're unlikely to get your items back
- > Some possessions are irreplaceable – don't risk it!
- > Burglary for theft of vehicle keys is at an all-time high
- > Insurance premiums are likely to increase after a break-in

ASK YOURSELF...

- > Does your door lock comply with the latest home insurance standards?
- > Do you know who has a key to your front door?
- > Do you know how many keys have already been cut for your front door?

DON'T BE A VICTIM

LOCK SNAPPING

Lock snapping is a method of entry where burglars apply force to the lock cylinder, rendering the lock useless. The locks most at risk of this type of attack are fitted with a euro profile cylinder, which are found in the majority of PVC and composite doors installed in the last 15 years and operate in combination with a multipoint lock.

Stay safe and secure, fit Breaksecure XP today

Easy to fit and super strong the Breaksecure XP cylinder is designed with a unique feature that offers maximum security as well as convenience. If forced, the front section of the cylinder is designed to snap off and prevent further penetration while under attack. Uniquely it leaves the cylinder still useable post attack allowing the key holder to still access using their key.

Easy to fit

Replaces your existing lock

Snaps off

If forced the front section is designed to snap off

Still useable

Even after snapping off you can still use your key

Be safe in your own home

Breaksecure

The front section of the cylinder is designed to snap off when forced, leaving the cylinder in place and the door secure.

Interlocking cam

The cams are designed to interlock, providing a greater degree of strength.

Bump resistant

Many cylinders can be easily 'bumped' - inserting and tapping an illegal key to release the cam and open the door. Break Secure XP is proven to resist this.

Crumple zone

The cylinder will collapse to a predefined pattern when under attack, leaving the core mechanism intact.

Grip resistant

Break Secure XP's Grip Resistant device prevents an intruder wrenching the lock with grips.

Anti-drill

Break Secure XP is engineered using high strength materials and robust construction to withstand prolonged drilling.

BREAKSECUREXP

Easy to fit

All you need is the correct size lock and a screwdriver!

Simply unscrew your interior handles, push the old lock out and put the new one in.

Guaranteed

We are so confident that Breaksecure XP will offer maximum protection to your home that we offer a full ten-year guarantee.

Patented key

Patented key for extra protection. Only Mul-T-Lock Approved Locksmiths can cut.

One key house

For high security with the ultimate convenience ask your locksmith about a keyed alike option for your Breaksecure XP cylinders, so that one patented key can unlock all your front, back, patio and other external doors.
