

BRIGHTON SHELTER

The Brighton shelter was designed to perfectly protect our Easylift Two tier bike rack systems from the elements

Cyclepods
Transforming bike storage

BRIGHTON SHELTER

Key Benefits

1. Fully modular system which can be extended to unlimited lengths
2. Single or double width options available
3. Robust and durable materials used. 4mm wall thick box section
4. Independently structurally engineered to ensure safe loadings throughout Europe
5. Double layer roof system provides low maintenance on sky facing and light reflecting on underside. (option)
6. Galvanised finish as standard. Powder coating optional
7. Surface or root fixings options
8. Designed to suit Two tier cycle parking perfectly
9. Intergral guttering optional
10. Intergrated LED light option
11. Hollow construction allows power and cctv cable to run within shelter legs to underside of roof.
