CLEMENT®

creating light...beautifully

Creating light beautifully with Clement®

Clement has its origins in the nineteenth century when the Clement family first became involved in the fenestration industry. It now has a broad range of shareholders who are committed to the Clement Windows Group (CWG) and its development.

Today CWG manufactures an innovative range of windows, which are regularly specified for use in Listed Buildings and Conservation Areas, as well as new build projects. All of our windows are crafted to your bespoke design in our ISO 9001 and ISO 14001 approved factory. Our range includes the beautiful steel doors and screens which are so popular with architects and designers and we offer a desirable range of conservation rooflights as well as new build projects that require thermally broken windows and doors.

We are very proud of the association Clement has with quality and aesthetics,

as is evidenced by our past client list which includes well known buildings such as Bonhams in London, Norwich City Hall and the Eldorado Building in Manhattan.

At Clement our aim is to provide superb quality products that will enhance the look of your property for generations to come. We are committed to developing an increased range of fit for purpose products that are environmentally friendly and meet the highest levels of specification and performance. From initial enquiry to the fitting of your new windows by our friendly and efficient installation teams, we strive to ensure every customer receives the best possible service.

If you would like to discuss your window requirements, please call us on +44 (0)1428 643393 or visit our website clementwindows.co.uk.

The Advantages of our Steel Windows and Doors

By choosing Clement you will benefit from:

Incredible strength and security

Steel is the strongest material on the market for windows and doors, incomparable to supposedly similar products made of aluminium. Our robust steel frames will last a lifetime, most likely outliving the buildings they are installed into. A number of Clement windows are available with our pioneering multi point locking system - tested to BS7950, this will enhance the security of your home.

Longevity and low maintenance

All Clement premium galvanised steel windows are hot dip galvanised and are available in a choice of fabulous Akzo Nobel powder paint colours. Akzo Nobel are rightly acknowledged as the global leader in advanced performance surface coatings.

Offered with a 10 year warranty these windows provide an average paint coating of over 100 microns - the industry standard is 60 microns. Requiring minimal maintenance Clement windows and doors will look stunning for many years to come!

Versatility and elegant sightlines

The attractiveness of steel is unsurpassed. Clement windows have slim, elegant frames which bring in lots of light as well as giving a beautiful appearance.

High thermal performance

At Clement we are continually developing and updating our window ranges, so that we can deliver to clients a choice of products that are designed for modern living and meet the exacting standards required by Building Regulations. The inclusion of only the very best glass units teamed with our innovative range of steel profiles result in high performing windows and doors that will reduce your energy bills.

Sustainability

Around the world more steel is recycled every year than the total of paper, aluminium, glass and plastic combined and so you will not be surprised to learn that all Clement windows are made from 98% recycled steel making them the 'green' window of choice for your project.

Our Window Ranges

EB16®. EB20® and EB24®

Exceptionally slender, high specification steel windows that can be crafted to your specific requirements, designed to replicate the appearance of existing or original windows. Regularly specified by architects for both conservation and new build projects.

SMW

A single glazed window primarily used for sensitive replacement work in Listed Buildings and Conservation Areas where double glazing may not be an option.

Brooking®

Developed for properties in the Hampstead Garden Suburb Trust area. Specifically designed for buildings which require a specialist 'putty fronted' system.

W2N

Developed during the 1960's and still regularly specified for traditional commercial/industrial projects or public buildings.

W40

Developed during the 1990s as a successor to W20. Generally specified for commercial/industrial projects or public buildings.

Clement doors/screens

A beautiful selection of steel doors and screens that can be used either to complement your steel windows or on their own to create a unique new look. Fire-rated products are also available.

Jansen

Our thermally broken, cold formed Jansen steel profiles offer slender frames with the added benefits of greater insulation and extra security.

Naked Steel®

A range of steel windows and doors with a difference. Depending on your application these can be available galvanised, clear lacquered, rusted, shot blasted, galvanised or painted.

Clement Conservation Rooflights®

A range of conservation rooflights to match either tile or slate roof profiles, ensuring a flush fit.

Window accessories

Clement windows are available in a broad range of RAL colours including bronze and metallics. Various glazing options are offered, with argon gas filled being the standard. We offer a wide selection of accessories, including, including handles, peg stays, hinges and ancillaries, available in a choice of finishes.
