Cyclepods
Transforming bike storage

BICYCLE PARKING

REGULATIONS
1. Bicycles must be parked in the designated area.
2. Bicycles must be locked to the Cyclepod.
3. Bicycles must be parked upright.
4. Bicycles must be parked with the front wheel facing the Cyclepod.
5. Bicycles must be parked with the front wheel facing the Cyclepod.
6. Bicycles must be parked with the front wheel facing the Cyclepod.
7. Bicycles must be parked with the front wheel facing the Cyclepod.
8. Bicycles must be parked with the front wheel facing the Cyclepod.

The Cyclepod-
Our Flagship product which makes a real impact. The eye catching design offers 2 locking points and secures 8 bikes in a 2 meter diameter

KPMG

The Spacepod-

A highly configurable product which uses 50% less space than the traditional bike rack. Offers 2 locking points and is an ideal solution where space is at a premium!

The Minipod-
A fun, colourful and compact design securing 8 bikes AND 8 scooters. Ideal for primary schools, encouraging cycling and the children love them!

The Minipod plus-

A more robust version of the Minipod offering all of the same benefits but with the durability required for parks and other public locations

The Scooterpod -
Fun & funky "toadstools" securing 12 scooters! Eye-catching, neat and small enough to be posted out in a box. Perfect for any nursery or school environment.

The Streetpod-

A highly secure and stylish product offering maximum bike protection for public locations and open spaces where bike security is a concern

At Cyclepods we believe that cycle storage doesn't need to be ugly! We are the only Carbon Neutral cycle storage company and offer a range of stylish solutions all of which are manufactured from either 100% recycled or recyclable materials.

All of our solutions are available in a range of different colours and finishes, ideal for different environments and advertising/branding opportunities. We believe that the use of recycled materials should not compromise quality and that bicycle parking should encourage cycling and a healthier way of life.

Unlike traditional bike racks our products do not allow overcrowding and as a result do not damage bikes, making us very bike and cyclist friendly!
