

ELIMINATE SWING DOORS

Exceptional transparency

All glass appearance

Bauporte Eliminate Automatic Doors offer the possibility to take conventional doors to a new level with dimensions and designs limited only by the imagination and technical limits of materials. We specialise in large and complex entrances, often incorporating in-ground drive units into our swing doors. Offering the benefits of conventional automatic doors, our custom made Eliminate entrances are available in a variety of single, double, multi and straight or curved configurations. Motors for automatically opening door leaves weighing up to 3,000 Kg are available. This unique Bauporte design eliminates the frame from view giving the doors an all glass appearance which adds to the elegance of all glass facades. These doors are made to measure in accordance with the client's height and width specifications. The largest automatic swing door that we have installed so far is over 6metres high.

TECHNICAL DATA.
