Connected solution for electric radiators

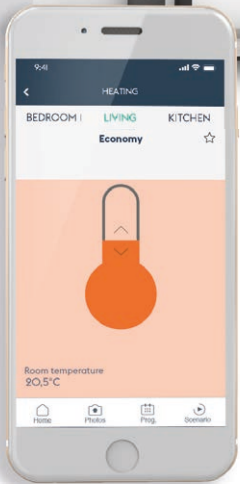

MDO BL TYXAL+
Opening Micro
Detector White

MINOR 1000
Wireless Room Thermostat X3D

Each radiator contains a wireless receiver

TYXIA 6410
Wall Mounted Receiver 1 Dry Output
Contact 5 Amp

TYBOX 5101
Wireless Room
Thermostat X3D

BENEFITS

- Local control of electric heating zone by zone with the thermostats
- Ability to centralise the control of 16 radiators by one thermostat
- Automatic activation of their heating frost protection mode when an open window is detected.
- Remote control and programming with the Tydom application
- Solution that can evolve at any time with the connected Delta Dore ecosystem
