

I MEARIN PLUS F FLAT CHANNELS

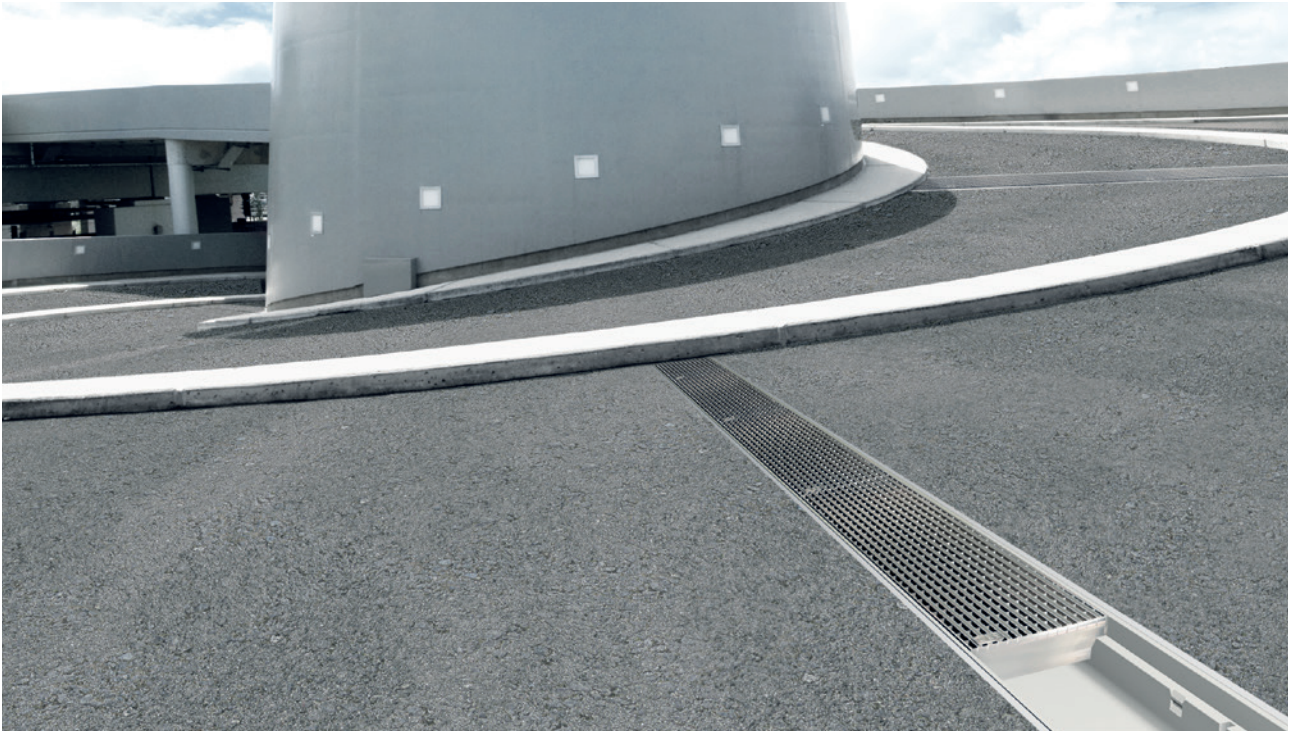

LOW HEIGHT, SUITABLE FOR ALMOST
EVERY APPLICATION

**DRAINAGE SYSTEM FOR RAILWAY PLATFORMS, PARKING DECKS, ACCESS RAMPS OF
UNDERGROUND AND MULTI-STOREY CAR PARKS**

DRAINAGE SYSTEM FOR APPLICATIONS WITH LOW CONSTRUCTION HEIGHTS

MEARIN PLUS F FLAT CHANNELS

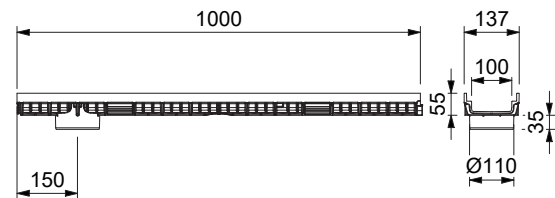

MEARIN PLUS F flat channels, with their low installation height, are excellent for the drainage of parking decks, multi-storey car parks and platforms.

The robust GRP channel body in Duroplast quality is dimensionally stable, abrasion-resistant and resistant to chemicals, frost and salty condensation water.

Advantages for planners, architects and dealers

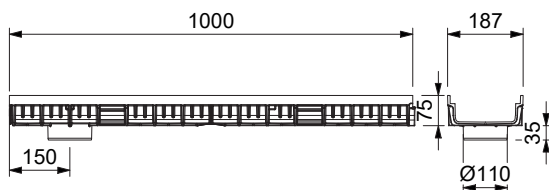

- > Low weight with loading class up to D 400
- > Optimal anchorage in the concrete base
- > Ideal for new constructions or renovation projects
- > Low thermal expansion
- > Simple plug-in system of the channel elements
- > No corroding parts
- > Also available as MEARIN PLUS F BLACK

The smooth inner surface of the channel body, which is durable over the years allows best rain water evacuation performance. A large choice of gratings made of galvanized steel, stainless steel, ductile iron and plastic combined with the CLIPFIX fast locking mechanism ensures quick and easy installation and removal of the gratings as well as an uncomplicated cleaning of the channel bodies.
