Tough choice

For decades, rubber flooring has been one of the world's most popular hard-surface flooring types for a wide variety of indoor situations, such as airports, department stores, kindergartens, schools, hospitals, offices and residential buildings. Now, after many years of research, development and heavy testing, Jaymart brings you a new generation of rubber floorings. Jaymart's Rubber Collection is a range of innovative products that are tougher, more flexible and more suitable in more situations than ever before. These floorings are made of natural and synthetic rubber, using eco-friendly colour pigments and mineral fillers, yet every product in Jaymart's range is characterised by its increased load-bearing capacity and suitability for installation under the most varied and difficult conditions. In heavy traffic situations, rubber flooring has for a long time been the obvious choice. It's safe, durable, flexible, low maintenance, and it's tough. Now, with the range and improved characteristics of Jaymart's rubber flooring, making a tough flooring choice has never been easier

Responsible choice

Jaymart's rubber flooring has been developed to improve performance and safety while also being more ecologically responsible. It has a lifetime cost that is well below most other flooring materials, and can also now be used in nearly any flooring application, including directly above under-floor heating. The floorings are compatible with eco-friendly and solvent-free dispersion adhesives, they contain no PVC, formaldehyde, cadmium, asbestos, CFHC or plasticisers, and will not release any harmful substances in any situation.

Versatile choice

Rubber is a versatile, heavy duty, environmentally friendly floorcovering.

Jaymart can offer a wide range of rubber flooring in rolls and tiles, in an extensive and vibrant colour palette for use in every application imaginable such as Gyms, Airports, Banks, Barracks, Public Buildings, Apartment Blocks, Chain Stores, Cinemas, Colleges, Office Buildings, Department Stores, Factories, Hospitals, Hotels, Homes, Sports and Leisure Centres, Stadia, Theatres, Universities

At A Glance

Our range of rubber flooring offers the following key features and benefits

- Rubber is extremely durable and hardwearing leading to long life expectancy and further conservation of material resources.
- Jaymart rubber flooring is coated with a factory applied finish to prevent marking and making it easier to maintain reducing cleaning costs and use of harmful chemicals to maintain the floorcovering.
- Rubber is environmentally friendly - it contains no PVCs, Plasticers or halogens. Leading to a healthier environment in the application
- Toxicologically safe
- Flame retardant – Rubber flooring guarantees low Opacity and smoke toxicity in the case of fire.
- Good resistance to chemicals (Even diluted acids!) and oils

Jaymart's range of superior quality rubber flooring is a bespoke range made especially for your project. Available in a phenomenal range of designs and colours there is something for every type of project and application. We can also work with you on bespoke colours subject to minimum order quantities. Please consult with our technical team for more information.

Please note colours in literature are a likeness, for exact colours please ask for samples.

SPORTWAY HE

SPORTWAY HE , with hammered surface and chips design, is a flooring exclusively designed for high stress areas. So it is particularly recommended for skating-rink perimeters, body-building and weightlifting halls, changing rooms and high-impact areas.

This floor covering is composed by a top layer extremely resistant to wear and tear and by a special underlayment designed specifically for these applications.

The top wear layer ensures a high resistance to the blades of ice skates while having an excellent slipping resistance.

During the manufacturing process the floor is treated by an appropriate procedure to UV rays.

The treatment with UV rays makes the surface more dense and compact: it acts to effectively repel dirt and makes the surface highly resistant to impurities. This generates big savings and also helps protect the environment.

GYMWAY UNI & TERRAZZO

Gymway Uni

Gymway Terrazzo

GYMWAY is a new addition to our rubber flooring ranges - available in hammer textured Gym Flooring made from solid rubber and available in tile format with bright vibrant and attractive colourways

Gymway is available in a Hammer texture in both uni and terrazzo designs. They provide excellent noise and thermal insulation as well as excellent impact absorption, noise reduction as well as protection to the subfloor. They also offer high tensile strength and have a non-porous surface for easy cleaning and a long useful lifespan.

Gymway is extremely flame retardant class Bfl-s1.

Gymway can be used in ice rinks, golf clubs, fitness centres for use with dumbbells and weights as well as crossfit areas.
