Dyson hand dryers offer many advantages compared to other hand dryers. All Dyson Airblade hand dryers are outfitted with HEPA filter, which captures 99,95 % of particles up to 0,3 microns from the

washroom air. The hand dryer takes just 10 - 14 seconds to dry hands. Operation costs can be saved thus. It is up to 80% less expensive to run than other hand dryers and even up to 98% less than

paper towels. Resulting in less environment pollution.
