## A New Generation of Broxap Street Furniture

At Broxap, we're driving change. Under our **continuous investment** programme Project Transform we aim to lead by example, putting **sustainability** at the heart of everything we do.

- **Carbon management** – Equipping our factory with smart technologies supports operational efficiency, green energy production and reduced energy consumption as we work towards net zero targets.
- **Sustainable procurement** – We only use a supply chain who take environmental responsibility seriously and proactively encourages a 'reduce, reuse and recycle' culture.
- **Waste management and biodiversity** – Through on-site initiatives, including using waste wood to heat our production facility, we are a certified Zero Waste to Landfill business. Our use of FSC certified timber in our products supports biodiversity in forests around the world.
- **Construction and refurbishment** – As well as engineering our products to BREEAM's standards and CE marked steel functions, care is taken in our own construction projects to minimise environmental impact such as the addition of solar panels to our factory.
- **Innovation** – By optimising our systems we are building a smart factory, such as investing in a nanotechnology pretreatment automated powder coating plant.
- **Transport** - With all our services operating from under one roof we have reduced site to site journeys and switched to a fleet of electric forklift trucks.

Through inclusive designs, sustainable manufacturing initiatives, and high-quality installation projects Broxap is transforming outdoor spaces every day across the UK. We hope by detailing our progress, sharing our plans and showcasing some of the schemes we have worked on, we can build a brighter future for our communities together.

## Our Goal

We are market leaders in the design, manufacture and installation of street furniture, seating, litter and recycling bins, bollards, canopies, shelters and covered walkways, cycle parking products and outdoor gym & playground equipment. Our goal is to supply these products to every city, town and village in the UK, creating outdoor spaces people can enjoy.

# Project Transform

Project Transform is a continuous investment programme to keep Broxap at the forefront of client-led product development and sustainable manufacturing.

Investing in stand-out technologies, automatic systems and high-precision machinery enhances efficiency along the production line and optimises the skills of our employees. Broxap is committed to manufacturing excellence and supply chain responsibility, integrating a blend of digital technology solutions into our production facility and embedding sustainability improvements into operations.

125,000 sq ft Manufacturing Facility

21,600 sq ft Street Furniture & Shelters Production Facility

10,000 sq ft Timber Production Facility

10,200 sq ft Litter Bins & Recycling Bins Production Facility

Mechanised Industrial Material Handling Trailers

### Eco-Friendly Fibre Laser-Cutting Machine (with automated loading/unloading tower)

Amada ENSIS 3015 3kW Fibre Laser Cutting Machine with ASF3015 - 9 Shelf Tower System

### Press Brake with ATC (Automatic Tool Changer)

HRB 1003 ATC Pressbrake & HRB2204 ATC Pressbrake

The only one of its kind, the ATC considerably reduces set-up time and delivers the best balance of performance in terms of speed, dynamics and reactivity. The combination of auto-crowning and the optional Bi-S device provides maximum angle precision and linearity unrivalled on the market.

### Eco-Friendly Automated Powder Paint Plant

Eurotherm - Automated Powder Coating Line

Incorporating the power of Pronortec, a highly innovative nanotechnological metal pretreatment process, the PFS Eurotherm automated powder coating line increases capacity while maintaining a high quality finish and reducing water and energy consumption.

### 5 Head Planer Moulder

Wadkin Bursgreen M523EL Easy Set

### CNC 5-Axis Machining Centre

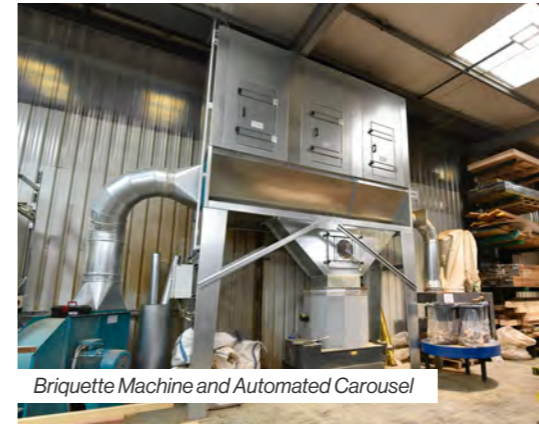

SCM 5 Meter Bed Accord 25FX

Numerical control machining centre (CNC), with mobile gantry and fixed worktable, combines state of the art technology with extreme ease of use, for flexible production of solid wood parts and other types of materials.

### Biomass Briquette Machine & Factory Heaters

Briquette Machine and Automated Carousel

Wood Waste Heater

Our innovative solutions have also earned zero-waste to landfill certification, as we reduce, reuse and recycle materials including using wood waste to heat our factory.

# In-house Design Consultancy

We specialise in architectural metalwork structures and bespoke street furniture design, working with our partners to safely fulfil the project brief, on time and on budget.

Through our website and digital specification channels, detailed technical information about our products, including BIM objects, has been made instantly accessible for efficient collaboration.

Our design office works directly with end users and project partners to share a wealth of knowledge and expertise, ensuring our bespoke installations achieve the desired design goal.

# Outstanding Solutions for... Education

From school rebuilding programmes to bespoke educational facilities, extensions and refurbishments, our products create inspirational learning environments.

We help to develop safe and inclusive settings, spanning early years to higher education. Whether it's building social zones such as outdoor dining and play areas, or supporting learning outside the classroom, our teams produce impressive spaces which encourage achievement and growth.

# Outstanding Solutions for... Transport & Rail

Connected locations boast environmental, economic and social benefits.

Our work with transport and rail hubs supports sustainable onward travel options for passengers, offering flexibility, reducing congestion and helping people to enjoy a more pleasant, healthier stress-free journey.

With integrated covered walkways, secure cycle parking facilities, and comfortable waiting areas, our green transport solutions keep places moving.

# Outstanding Solutions for... Public Realm & Retail

Our products enhance the potential of villages, towns and cities by creating clean, green and happy places.

By supporting community priorities, such as investment in local infrastructure, we help to generate prosperity, spark growing economies and deliver success.

Improved shared spaces bring people together and increase social interaction, creating thriving hubs to attract new businesses, shoppers, tourists and employees.

# Outstanding Solutions for... MOD & Law Enforcement

Our consistently high quality standards meet the demands of all sites which call for an on-point product performance.

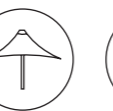

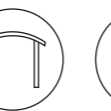

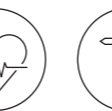

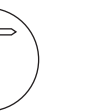

Safe, strong and robust enough to withstand heavy and repeated use, our clients and end users can be assured our design and manufacturing processes result in reliable, long-lasting structures.

Our record in the defence sector is one of providing first-class facilities, designed, manufactured and installed using compliant systems and fit to serve for future generations.
