GVL / RZN Control Panel

(Group 1)   (Group 2)

RCM 024-11-U remote receiver

Connections to second PS-24-1-U if required (Group 2).

PS-24-1-U Control Panel
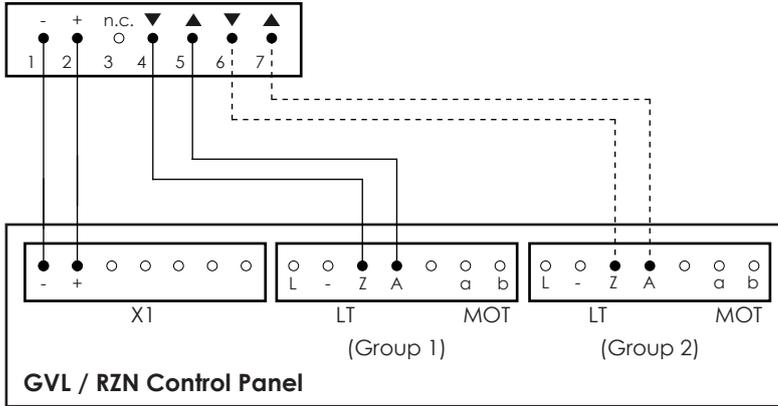

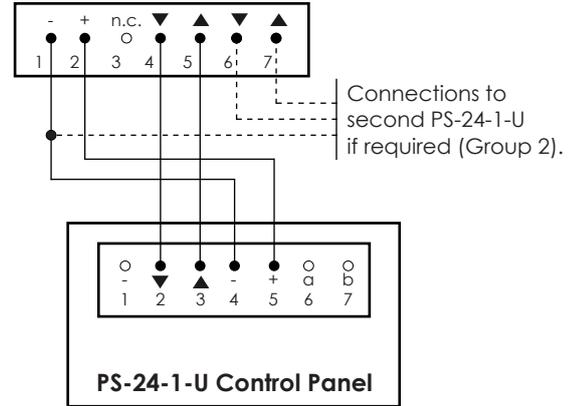

Paring RCR 11 remote control to RCM 024-11-U	
Start	**Start:** Hold the set button for 5 seconds or until a single beep is heard, the control panel is now in pairing mode.
Level 1 Short beep = paired / Long beep = unpaired	**Level 1 (pairing of Group 1):** The RCM will be emitting a single beep every 5 seconds. Press and hold the right/down button of the first selector on the RCR 11 remote control for 2 seconds or until a short confirmation beep is heard. If Group 2 is required, press the left/up button on the remote control once and see Level 2. If not, skip to Level 3 by pressing the left/up button twice.
Level 2 Short beep = paired / Long beep = unpaired	**Level 2 (pairing of Group 2):** The RCM will now be emitting a double beep every 5 seconds. Press and hold the right/down button of the second selector on the remote control for 2 seconds or until a short confirmation beep is heard. Press the left/up button on the remote control and see Level 3.
Level 3 Short beep = non-latching / Long beep = latching	**Level 3 (non-latching/latching):** The RCM will now be emitting a triple beep every 5 seconds. As standard the RCM operates in non-latching mode (window will only open if the button is held). If latching mode is required instead (window opening fully from a single press of the button), press and hold right/down button for 2 seconds.
End Short beep = confirmation	**End:** To complete the pairing process, press the set button, a single confirmation beep will be heard. The remote control is now paired to the control panel.
