# 1. PURITY

## Exclusive and elegant design

For people who desire a ultimate design, a unique Reynaers handle series is created, called PuRity. This series combines next-generation material and mechanical properties with the superior Italian design abilities of designer Leo De Carlo. PuRity is innovative and distinctive in terms of material, design and installation. The PuRity range is suited for all Reynaers windows, doors, sliding doors and lift&slide doors.

## Material

PuRity handles are made of a brand new material called PURA which is fully recyclable, 100% ecological, non-corrosive and anti-allergic. The unique BIOV or "Bioecologic Ion Overlay" process finishing is based on the deposition of gaseous metal ions, applied under vacuum. This coating is 100% ecological and recyclable which makes the handles extremely resistant against wear, very suited for aggressive environments and as an option even **anti-bacterial**. The combination of the material and surface treatment makes PuRity a sustainable handle!

## Design

The PuRity range is fully adapted to the use- and design needs of constructors. The result is a minimal, classical and rational design that will give the Reynaers systems a unique touch.

## Installation

We also provide the handles with their own unique new-generation mechanism, named Cliq-Claq. This mechanism slides over the square spindle of the doors or windows, and then snaps into place. Consequently, it ensures stronger fixation and allows the handle to return to the perfect position.

## 2. Contour

### Modern safety

CONTOUR is Reynaers' new range of robust stainless steel handles in a fresh and modern design to meet even the strictest durability and safety demands. CONTOUR is compatible with most systems and opening types such as SlimLine 38, MasterLine 8 and 10, CP 130 and CP 155 and Masterpatio.

### Material

CONTOUR handles are made of stainless steel which is very durable and highly resistant against corrosion.

The robust stainless steel in this handle range is not only a protection from burglar attacks, the clean and pure material is easy to maintain, resistant to cleaning products, and therefore often the material of choice in demanding environments like hospitals. The fact that stainless steel is recyclable makes CONTOUR handles a sustainable choice!

### Design

The CONTOUR range meets all requirements for a modern or contemporary home. Their timeless design and high quality add value to the property and give a feel of luxury, without compromising on functionality.

### Safety

CONTOUR handles contribute to your safety. Most of the handles have an SKG\*\* or even SKG\*\*\* classification and are applicable on Reynaers Certified RC2 systems, which means they are highly resistant against burglary.

### Colours

#### Available colours

Contour handles are available in stainless steel only.

## 3. Touch

### True elegance

TOUCH handles exude true elegance and fit into any type of architecture. Create an aesthetic look with this minimalist timeless design, tailored to the needs of contemporary living, without sacrificing ease of use.

### Material & finish

The touch handles and cup handles are produced with carefully selected, high-end materials. Most handles can be powder coated in over 450 RAL-colours in a matt, glossy or coatex surface finish and/or anodised in various tones. This way, we ensure a perfect match with the profiles of the window.

An antimicrobial coating is available on all existing colours and types of powder coating and anodization finishes, and proven to significantly reduce the risk of pathogen transfer.

### Design

Style and quality are combined in Touch, a trendsetting range of design hardware from Reynaers Aluminium. Touch offers sleek, elegant and slim hardware, suitable for windows, doors, sliding and folding doors. It is even suitable for use on wooden interior doors, to allow for a consistent design look throughout your home. The sleek design fits perfectly into modern homes, but also provides a stylish contrast in renovations.

### Safety

The Touch Security handles and cup handles are burglar proof. Door handles are fitted with a long shield in solid aluminium, making the cylinder almost impossible to access, and even harder to break.

## 4. Horizon

### Exclusive and elegant design

Looking for new horizons. That's the ultimate goal of just about everyone who goes building or renovating.

The Horizon handles merge, almost invisibly, into a window. Because of this they fit perfectly with all possible architectural styles.

### Material

Horizon is built from molded or air pressed aluminium. By using pure material the handle range has a wider variety of finishes.

An antimicrobial coating is available on all existing colours and types of powder coating and anodization finishes, and proven to significantly reduce the risk of pathogen transfer.

### Design

With a sleek design Horizon handles make the perfect combination for any window or door system.

### Installation

The Horizon range has been a consistent companion for Reynaers profiles through our years. This allround, low entry handle range has a solution for every opening type, whether it is as simple as a window or as specific as a panic door.

### Colours

#### Available colours

The Horizon handles can either be anodized, or powder coated in one of our 400+ RAL-colours.

## 5. Olimpo

### Affordable design

The OLIMPO line introduces an up-to-date design that meets the latest aesthetic trends.

### Material

The Olimpo handle combines technical solutions of high quality with valuable materials. Available in a wide range of powder-coated, anodized and pvd finishes.

Also available in the mill-finished version for an easy assembly with no need of any special tooling.

### Design

The smooth shape of the handles is enhanced by the many finishes available which contribute to meet the highest quality and aesthetic requirements.

### Colours

#### Available colours

Olimpo is available in all RAL colours, textured and anodised. A handle in the same colour as the frame of the window or door is also possible.

## About Reynaers Aluminium

Reynaers Aluminium is a leading European specialist in the development and marketing of innovative and sustainable aluminium solutions for windows, doors, curtain walling, sliding systems, sun screening and conservatories. Besides offering an extensive range of standard solutions, the company also develops solutions that are tailored to the individual customer or project. Research, product development and testing are conducted at the Reynaers Institute, the sector's largest private innovation and

testing centre, located in Duffel (Belgium). In addition, the company also provides extensive technical support and advice to fabricators, contractors and architects. sliding systems, our new glass balustrade arrangements, the Mosquito system, and curtain wall system CW 50.

The unique concept makes it possible to combine an extensive range of window opening types, design variants, and different levels of thermal insulation.
