## Outdoor Gym Equipment

for Schools, Colleges  
& Universities

## A social platform to boost student health

At Sunshine Gym we work in partnership with education providers to help schools, colleges and universities inspire young people to keep active.

An outdoor gym is perfect for motivating students, promoting healthy activities that young people can also engage with outside of study. Our equipment is designed to build confidence, encouraging an interest in wellbeing and an understanding of the importance of personal fitness for a healthy lifestyle.

As well as tracking improvements and overcoming challenging workouts, students have the opportunity to develop key techniques through their use of a Sunshine Gym. An outdoor gym also supports an extensive programme of sports as it can be used effectively in team training and performance coaching.

As a UK leading designer, supplier and installer of outdoor fitness equipment, we will guide education leaders through the whole process of establishing a Sunshine Gym. And because we are part of family-owned engineering group Broxap Limited, we can also offer expertise in a range of additional outdoor improvements such as seating; shelters, canopies and covered walkways; and play, sport and cloakroom equipment. Safe, durable and cost effective, our high-quality product range will ensure your investment continues to deliver active benefits year after year.

### Sunshine Gym mobile app

Complete with lesson plans, how to use instructions and workout timers, our app assists in developing the knowledge & skills of the teaching staff to deliver even better PE lessons.
