

## Platform Lifts for Educational Buildings

**In the last three years, Gartec has installed over 250 lifts in schools, colleges and universities.**

If you need a lift for any kind of educational building, then you can't go wrong by specifying the industry leader. Gartec is the preferred choice for schools and colleges because we understand the demands of the sector like no other lift company. Through our knowledge of the education environment, over the last three years we have been asked to install over 250 lifts in learning institutions of one kind or another.

### **Tough enough**

Our lifts are tough enough for the job, with vandal resistant features such as flush buttons, and the option to restrict access via a locking facility, specially designed for schools.

### **Safe enough**

Safety need not be a concern. All our access products include features such as safety sensors around the platform, non-slip flooring and overload indication as standard. Including a full shaft enclosure in a schools environment also reduces safety concerns raised by more boisterous behaviour.

### **And convenient too**

The installation time for a standard lift is only 2 days, so any disruption to the learning facility is kept to an absolute minimum.

# We're more experienced than you might think...

## Some of our recent installations:

Royal Ballet School, Richmond Park  
Royal Russell School, Croydon  
St. Albans Pre Prep School
