

## Product Focus

### Lovair Maxi Slab

- This is a continuous and seamless hand washing facility which is available in 5 sizes: 600mm, 1200mm, 1800mm, 2400mm and 3000mm
- The body of the slab is made from Corian solid surface and therefore is available in a variety of colours and finishes.
- The slab has a large area for water and soap to run off making it a practical, attractive and water saving hand washing facility for all types of commercial washroom.

It has the following unique features:

#### **Specially designed sensor taps**

These are manufactured to correct proportions in order to minimise splashing and decrease water consumption.

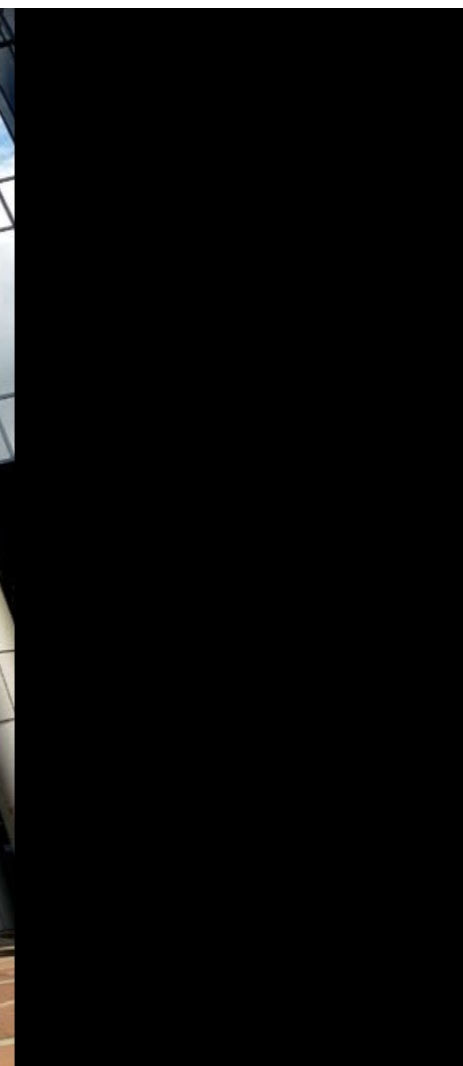

The sensor taps are available in satin and chrome finish.

#### **Concealed stainless steel drainage system**

Instead of a plug hole, there is a narrow slit which is visible at the rear of the slab for the water to run out of.

#### **Modular bracket system**

This aids easy installation and has optimum structural strength.

### Exchange Tower

Exchange Tower, located just a few minutes from Canary Wharf has recently upgraded three floors in a phased project. The objective was to refurbish this iconic office building. The Architect involved specified the Lovair Maxi Slab; a continuous hand washing facility.

Essentially the design of the facility worked perfectly with the modern, minimalist aesthetic they were looking to achieve. With a combination of a high quality of finish, crisp design lines and integrated water saving sensor taps, the end result was impressive.
